**ADDENDUM 001  
REQUEST FOR BID  
D611-022-RW-Demolition I-70**

Bidders shall acknowledge receipt of Addendum 001 (ONE) by signing and including it with original bid. The due date for receipt of this proposal **does not change** by this Addendum. Accordingly, the following clarifications, questions and answers are believed to be of general interest to all potential bidders. All other terms and conditions remain unchanged and in full force.

Name and Title of Signer (Print or type)	Name and Title of Department Authority  Terri Mount Sr. General Services Specialist
Bidder Signature	Department of Transportation  <i>Terri Mount</i>
Signature of person authorized to sign	Authorizing Signature
Date Signed:	Date Signed: 09/07/10

**CLARIFICATION CONCERNING CONCRETE ROOF ON PARCEL 79 WESCO MACHINE BUILDING**

Wesco Machinery Building. Exhibit C, Section 16 discusses Non-Friable Roofing ACM on the concrete roof of the building.

After further meetings with St. Louis Air Pollution Control Program staff as well as MoDOT's Third Party Asbestos Air Inspection staff, MoDOT has determined that removal of the roofing ACM in lieu of disposal of the concrete roof with the ACM roofing material left in place is likely the best option for this project.

After removal of the ACM roofing material, the concrete roof can be broken up and used as clean fill. For the concrete roof to be considered as clean fill substantially all of the ACM roofing material shall be removed which includes removal of all loose material and debris. Minor roofing residue in small cracks and crevices can remain so long as substantially all accessible roofing material is removed. For disposal purposes all removed material and debris

shall be considered as ACM. All work required to remove and dispose of the ACM roofing material will be considered incidental to the work and be considered included in the contract unit price for demolition and removal of the building.

The contractor may still elect to dispose of the concrete roof with ACM left in place, however the roof cannot be considered as clean fill and all of the concrete roof will be required to be disposed of as asbestos waste.
